CartoWeb3 Plugins Board

Plugins interfaces summary and entry-points timeline for CartoClient and CartoServer

See client/ClientPlugin.php and client/Cartoclient.php

See server/ServerPlugin.php and server/Cartoserver.php

Note 1:
Only if Ajax is enabled
Ajax possible levels of activation are:
1 LOAD
2 PROCESS
3 SERVER CALL
4 FULL
Depending on the selected level, some methods will be enabled or bypassed.

Note 2:
Only if Ajax is enabled

Note 3:
Always enabled

Note 4:
Always bypassed

Preinitialize:
- initialize
- initUser::handleInit

Initialize:
- Ajaxable::ajaxHandleAction
- Sessionable::loadSession
- Sessionable::createSession
- FilterProvider::filterPostRequest
- FilterProvider::filterGetRequest
- GuiProvider::handleHttpPostRequest
- GuiProvider::handleHttpGetRequest
- ServerCaller::buildRequest
- ServerCaller::overrideRequest

Note 1:
Only if Ajax is enabled
Ajax possible levels of activation are:
1 LOAD
2 PROCESS
3 SERVER CALL
4 FULL
Depending on the selected level, some methods will be enabled or bypassed.

Note 2:
Only if Ajax is enabled

Note 3:
Always enabled

Note 4:
Always bypassed

CartoServer
